

## Objective

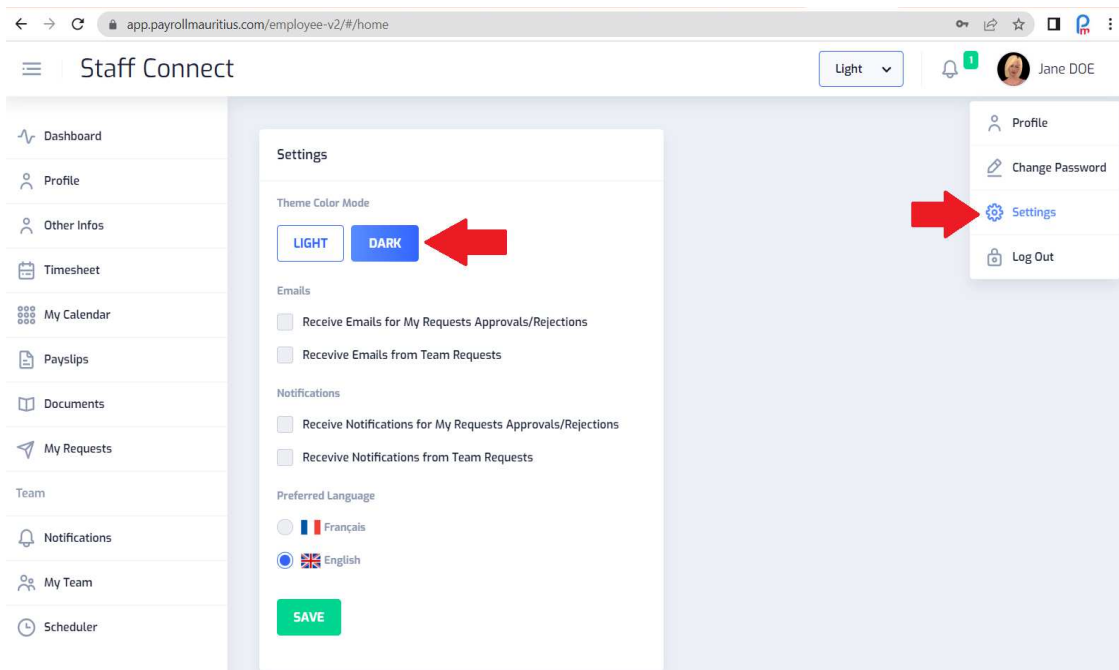

**Payroll Mauritius** is contributing to the reduction of greenhouse gases emissions ([https://en.wikipedia.org/wiki/Greenhouse\\_gas](https://en.wikipedia.org/wiki/Greenhouse_gas)) by reducing the power consumption of its application to limit the environmental footprint of its customers.

## How to do this ?

Taking into account that the **Staff Connect** mobile application (<https://app.payrollmauritius.com/>) available to Employees is potentially the most energy consuming, **Payroll Mauritius** has introduced the possibility of using the mobile application in **"Dark Mode"** ([https://en.wikipedia.org/wiki/Light-on-dark\\_color\\_scheme](https://en.wikipedia.org/wiki/Light-on-dark_color_scheme)).

This dark mode automatically converts all the screens, buttons and icons used to black, thus not "lighting up" the pixels and thus reducing the power consumption of the device (mobile phone, computer, tablet).

To do this, in the Staff Connect mobile application, select the **"Settings"** menu in the profile top right button and click on the **[Dark Mode]** button: the application then switches

to dark mode in real time.

Confirm your choice by clicking on the **[SAVE]** button to save your choice for future use.

**Congratulations**, with a simple click, in addition to limiting the emission of blue light harmful to your eyes in the long term, you have **just done something for the planet and future generations!**
